Permissions defined in this policy Info

Copy | Edit | Summary | JSON

Permissions defined in this policy document specify which actions are allowed or denied. To define permissions for an IAM identity (user, user group, or role), attach a policy to it

```
1  {
2      "Version": "2012-10-17",
3      "Statement": [
4          {
5              "Effect": "Allow",
6              "Action": [
7                  "secretsmanager:GetSecretValue",
8                  "secretsmanager:DescribeSecret"
9              ],
10             "Resource": "*"
11         }
12     ]
13 }
```

role-lamda-mateo Info

Allows Lambda functions to call AWS services on your behalf.

Summary

Creation date	ARN

index.mjs > handler

```javascript
import { SecretsManagerClient, GetSecretValueCommand } from "@aws-sdk/client-secrets-manager"; // Importa solo lo necesario
const client = new SecretsManagerClient({ region: "us-east-1" });
export const handler = async (event) => {
    const secretName = 'ApiNumberVerifyMateo';
    console.log('Attempting to retrieve API secret');
    try {
        // Obtener la clave de API de Secrets Manager
        const command = new GetSecretValueCommand({ SecretId: secretName });
        const data = await client.send(command);
        console.log('API secret retrieved successfully');
        const secret = JSON.parse(data.SecretString);
        const accessKey = secret.api_key;
        // Extraer parámetros dinámicos del evento
        const phoneNumber = event.phoneNumber || "14158586273";
        const countryCode = event.countryCode || "";
        const formatParam = event.formatParam || 1;
        // Construir la URL de la API
        const apiUrl =
        `http://apilayer.net/api/validate?access_key=${accessKey}&number=${phoneNumber}&country_code=${countryCode}&format=$
        // Realizar la solicitud HTTP usando fetch
        const response = await fetch(apiUrl);
        const result = await response.json();
        console.log('API request successful');
        // Devolver la respuesta en formato JSON
        return {
            statusCode: 200,
            body: JSON.stringify(result),
        };
    } catch (err) {
        console.error(`Error: ${err.message}`);
        return {
